

A goods lift is designed for the vertical transport of materials / goods at multiple elevations. Goods lifts reduce the risks of injury caused by manual lifting, and they offer low power consumption which is a highly cost-effective solution for businesses. With low pits and low headroom features, Goods lifts are suitable for easy installation in existing buildings.

We offer a wide range of Goods lifts, : Hoist Lift , Hydraulic Platform Lift , Table Lift

SALIENT FEATURES :

- ◆ It can be erected outside or inside a building. In absence of RCC well, fabricated steel enclosure is offered.
- ◆ Guide Rail is provided along the height of the Lift fitted with Guide shoes/ Roller wheels. This ensures smooth vertical movement with least frictional load.
- ◆ Customised rigid built cage enclosed with safety nets and collapsible gates at entry. These gates are electro-mechanically locked to prevent unsafe use.
- ◆ Interlocking Limit switches at all levels with over-hoisting & lowering prevention. This prevents accidental casualty.
- ◆ Indef / Sureka Make Quality assured Hoisting Equipment used for trouble-free usage for years.
